

Plymstock students teach at Oreston Community Academy

Students studying Health and Social Care delivered presentations to Year 5 /6 children at Oreston Community Academy recently. The themes included, Road Safety, Fire Safety, Beach and Water Safety, Sun Awareness and Smoking.

The students planned their sessions as part of their communication topic and made a positive impact upon the children at Oreston. The children listened attentively and showed great respect for Plymstock leaders. Plymstock leaders communicated clearly and were good role models for the younger children.

We have very strong working relationships with our partner primary schools and projects like this help the children to make a smooth transition from KS2 to KS3.
